

Experience Letter

Intern ID : 0203EC2026

Date : Sept 02, 2026

This is to certify that **Saiprabha C Y** successfully completed her internship with MacroEdtech as an Electronics Engineering Intern from March 02, 2026 to September 02, 2026. During her six-month tenure, Saiprabha demonstrated exceptional dedication, technical curiosity, and a strong ability to learn and apply engineering concepts in practical projects. She successfully completed all assigned tasks and consistently showed professionalism, ownership, and a willingness to work through technical challenges. Her contributions covered several areas of electronics engineering, embedded systems, satellite communications, orbital mechanics, technical documentation, and engineering software development.

One of her major contributions was our 1U CubeSat Project, which she completed in a phased and systematic manner. She began by developing and studying the technical documentation required for the mission and conducted an in-depth study of the major subsystems and components required for a 1U CubeSat, including the On-Board Computer (OBC), Electrical Power System (EPS), communication subsystem, sensors, telemetry and command systems, attitude-related components, batteries, solar power components, antennas, and supporting electronic hardware. She also worked on PCB design using KiCad, gaining practical exposure to electronic design workflows and hardware development. Her work demonstrated an ability to connect theoretical concepts with practical spacecraft engineering requirements. In addition to the CubeSat project, Saiprabha contributed to Arduino-based data analysis, prepared technical reports on satellite communications, and developed an Orbital Mechanics Calculation application using Visual Studio Code, along with maintaining a corresponding GitHub repository. These assignments provided her with practical exposure to programming, engineering calculations, technical documentation, data analysis, and software development practices.

Saiprabha also contributed to the development of GATE Electronics and Communication Engineering (GATE EC) learning modules, demonstrating her ability to work across both technical project development and educational content creation. Throughout her internship, Saiprabha displayed strong commitment, responsibility, and perseverance. She performed exceptionally well in the tasks entrusted to her and made valuable contributions to our technical initiatives. Her work on the CubeSat project, in particular, reflects her ability to approach a complex engineering problem in a structured and phased manner.

We sincerely appreciate Saiprabha C Y for her valuable contributions to MacroEdtech and wish her all the very best for her future academic, professional, and engineering career. We are confident that her technical skills, learning attitude, and dedication will help her achieve continued success in the future.

Sincerely,

Sagar Sakalley (DIN 10568939)

Founder & Director, MacroEdtech

Letter of Recommendation

I am pleased to recommend **Saiprabha C Y**, who completed her six-month tenure as an Electronics Engineering Intern at MacroEdtech from March 02, 2026 to September 02, 2026. During her internship, Saiprabha demonstrated exceptional dedication, technical curiosity, and a strong willingness to learn. Her major contribution was to our 1U CubeSat Project, where she worked in a phased manner, beginning with technical documentation and an in-depth study of CubeSat components and subsystems, including the On-Board Computer (OBC), Electrical Power System (EPS), batteries, solar power, communication systems, antennas, sensors, telemetry, and command systems. She also gained practical exposure to PCB design using KiCad and developed a strong understanding of system-level engineering and spacecraft electronics.

In addition to her CubeSat work, Saiprabha contributed to Arduino data analysis, satellite communication technical reports, and an Orbital Mechanics Calculation application developed using Visual Studio Code, along with creating a GitHub repository for the project. She also contributed to our GATE Electronics and Communication Engineering learning modules. Throughout her internship, she consistently demonstrated responsibility, perseverance, structured thinking, and the ability to work across electronics, embedded systems, aerospace, software, and technical research. She completed all assigned tasks and performed exceptionally well. I strongly recommend Saiprabha for future opportunities in Electronics Engineering, Embedded Systems, Aerospace and Satellite Technology, and Research & Development, and I wish her every success in her academic and professional journey.

Sincerely,

Sagar Sakalley(DIN 10568939)

Founder & Director, MacroEdtech
